

## Ryan Sullivan

San Diego, CA (Open to Relocate) | [sullivan050ryan@gmail.com](mailto:sullivan050ryan@gmail.com)

[LinkedIn](#) | [Github](#)

### Summary:

As a recent graduate of the Flatiron School Fullstack program, I am a skilled Fullstack Developer with experience in front-end and back-end development. I have a strong foundation in programming languages such as Ruby on Rails and JavaScript, as well as experience with the ReactJS framework. Throughout my career as a Technical Recruiter prior to Flatiron School, I have demonstrated my ability to collaborate effectively in a team environment. With a passion for learning and a drive to create innovative solutions, I am eager to bring my skills to a dynamic and challenging work environment.

### Technical Skills:

Programming Languages: Ruby, JavaScript, HTML, CSS

Frameworks: Ruby on Rails, ReactJS, ExpressJS, Node.js

Databases: PostgreSQL, MongoDB, SQLite

Web Technologies: RESTful APIs, JSON

Tools: Git, Postman, Chrome DevTools

### Technical Projects:

#### Stock Tracker - [Github](#)

Stock Tracker is an app that allows you to track many different Stocks on a variety of indexes through data provided by the [Financial Modeling Prep API](#).

- Utilized Styled Components for a pleasant user experience and efficient CSS structure.
- Implemented BrowserRouter for fast and efficient application navigation.
- Utilized full CRUD actions on new and existing users as well as Full CRUD actions on a users set of portfolios.
- Utilized an API key that allowed for access to S&P 500 data with 250 requests per day.

#### Where's My Money - [Github](#)

"Where's My Money" is an expense/investment tracking app that allows you to keep watch of your overall expenses and investment performance.

- Created a Rails API to serve data to a React Frontend.
- Successfully created and maintained a SQLite database utilizing ActiveRecord Associations.
- Implemented MaterialUI Datagrid to create an optimal transaction user experience.

#### Hotel Azure Direct Booking Website - [Github](#)

Hotel Azure is a Direct Booking Website for a fictional hotel. It allows users to perform full CRUD capabilities with new or existing reservations.

- Built functionality to persist new data from a React Frontend to a Sinatra Backend.
- Implemented client side routing utilizing BrowserRouter for fast navigation.
- Implemented authentication to attain user persistence across pages.
